

BSAU APPLE iOS APPLICATION DEVELOPMENT CENTRE

Organizes a one day workshop on

SCRATCH PROGRAMMING

21 July 2017

About Scratch

Scratch is a programming language and an online community where anyone can program and share interactive media such as stories, games, and animation with people from all over the world.

Scratch supports the concepts like sequence, iteration (looping), conditional statements, variables, threads (parallel execution), synchronization, real-time interaction, boolean logic, random numbers, event handling and user interface design.

Scratch for Educators

You can help the students to use Scratch to code their own interactive stories, animations, and games. In the process, they learn to think creatively, reason systematically, and work collaboratively — essential skills for everyone in today's society.

Resource Persons

Mr. K. Subramanian,
Mr. F.M. Mohammed Farooq Abdullah,
Sirpi Softwares Pvt. Ltd., Chennai.
